

ONLINE APPENDIX B.2 RESPONSES TO THE MULTIPLE-CHOICE QUESTIONS

This section shows the responses of the 1,540 interviewed investors to the five multiple-choice questions in Online Appendix B.1, in the order in which the AI agent asks them.

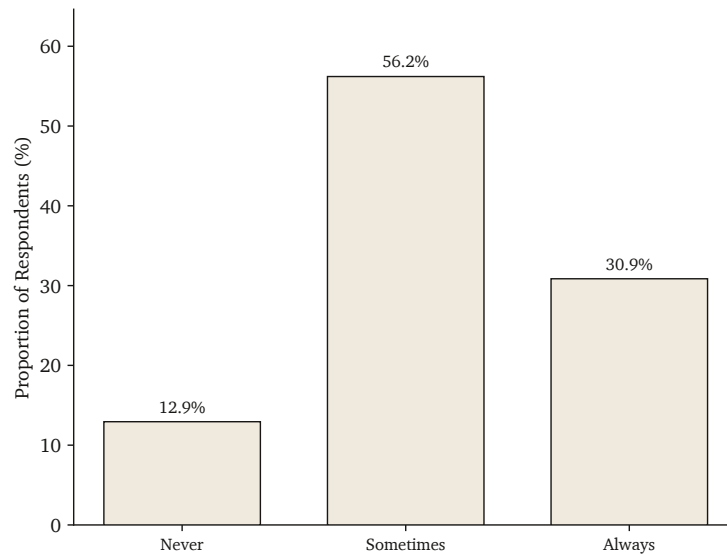

Figure B1: Tracking Prices After Selling.

This figure shows the distribution of responses to the multiple-choice question the AI agent asks at the end of the open-ended portion of the interview, “After you sell a stock, do you continue to track its performance and how its price evolves?” The three answer choices are “Never,” “Sometimes,” and “Always.” Each bar shows the share of investors selecting the answer choice, computed over the 1,507 investors providing a valid response. The shares are printed above the bars.
